
RESALE INTEREXCHANGE AND OPERATOR SERVICES TARIFF

VIII. DESCRIPTION OF SERVICE**A. Timing of Calls**

1. For all calls other than Operator Service calls, the Customer's long distance usage charge is based on the actual usage of Company's network. Usage begins when the called party picks up the receiver. When the called party picks up is determined, where available, by hardware answer supervision in which the local telephone Company sends a signal to the switch or the software utilizing audio tone detection. When hardware answer supervision is unavailable and software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling party hangs up.
2. For Operator Service Calls, charges to Customers for services described in this Tariff begin when the Company receives signalling to detect that the network connection between the calling party and the Company has been established. Chargeable time ends when the calling party "hangs up" thereby releasing the network connection.

B. Calculation of Distance

1. Usage charges for all mileage sensitive products are measured between rate centers associated with the originating and terminating points of the call.
2. The distance between the rate centers is calculated by using the vertical ("V") and horizontal ("H") coordinates found in AT&T Tariff FCC No. 10, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the rate centers.

Step 2 - Obtain the difference between the "V" coordinates of each of the Rate centers. Obtain the difference between "H" coordinates.

Step 3 - Square each of the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the mileage between the Rate Centers.
